

AI opportunity backlog

Entirely fictional. Case snapshot: August 31, 2026. Synthetic organizational evidence for a hackathon prototype.

Reading the backlog

Proposals as of August 31, 2026. Estimates are synthetic sponsor assumptions, not approved business cases or measured returns. EUR 45/hour is a planning value for capacity, not the KPI cost allocation rate. Build cost is one-time; running cost is monthly. Benefits must not be added when tasks or saved minutes overlap.

AI-01 | Ticket summarization

Origin: Support Operations. Expected benefit: Reduce wrap-up writing.

Estimated complexity: Low; 2-week sandbox build.

Assumed value: July pilot: 12 agents, 240 tickets, self-reported 2.5 minutes saved per eligible ticket after checking. Sponsor extrapolates $18,000 \times 2.5 / 60 = 750$ hours/month, valued at EUR 45/hour = EUR 33,750 capacity/month. Assumes all tickets qualify. Build EUR 18,000; running EUR 2,000/month.

Current status: Pilot completed; finance validation pending.

AI-02 | Automated classification

Origin: Service Desk lead. Expected benefit: Reduce manual labeling.

Estimated complexity: Low; 2-3 weeks.

Assumed value: 1 minute on 18,000 tickets = 300 hours/month; EUR 13,500 at EUR 45/hour. Build EUR 15,000; running EUR 1,200/month. Offline label agreement 89% on 400 manually labeled cases.

Current status: Sandbox experiment requested.

AI-03 | Intelligent routing

Origin: Regional leads. Expected benefit: Reduce incorrect first assignment.

Estimated complexity: Medium; 4-6 weeks.

Assumed value: Assumes 8% of tickets avoid 10 minutes of handling: 240 hours/month; EUR 10,800 capacity. Build EUR 30,000; running EUR 2,500/month. Requires fresher entitlement and availability data.

Current status: Requirements discussion.

AI opportunity backlog / 2

AI-04 | Response drafting

Origin: Customer Support. Expected benefit: Reduce repetitive writing.

Estimated complexity: Low-medium; 3 weeks.

Assumed value: Sponsor estimates 2 minutes on 9,000 eligible cases = 300 hours/month before extra review. Build EUR 22,000; running EUR 2,000/month. Benefits overlap with summaries.

Current status: Security review not started.

AI-05 | Customer FAQ chatbot

Origin: Digital Service team. Expected benefit: Offer immediate help outside staffed hours.

Estimated complexity: Medium; 6-8 weeks.

Assumed value: Assumes 10% of incoming cases deflected. Avoided workload is not a cash saving unless operating spend changes. No measured containment rate. Build EUR 50,000; running EUR 4,000/month.

Current status: Vendor proposal.

AI-06 | Sentiment detection

Origin: Customer Experience. Expected benefit: Flag deteriorating interactions.

Estimated complexity: Low; 2 weeks.

Assumed value: No cash estimate. Sponsor expects earlier outreach; multilingual precision and false alarms unmeasured. Build EUR 12,000; running EUR 1,000/month.

Current status: Idea recorded.

AI opportunity backlog / 3

AI-07 | Internal knowledge assistant

Origin: Enablement team. Expected benefit: Help staff locate relevant reference material.

Estimated complexity: Medium-high; 6-8 weeks.

Assumed value: Search time baseline and source coverage not measured. Access-aware connectors required. Build EUR 45,000; running EUR 3,000/month.

Current status: Discovery only.

AI-08 | Churn prediction

Origin: Customer Success. Expected benefit: Focus account outreach.

Estimated complexity: High; 8-12 weeks.

Assumed value: Potential renewal impact unquantified. Support, usage, commercial and relationship signals need account-level joining. Build EUR 70,000; running EUR 4,000/month.

Current status: Waiting for data feasibility review.

AI-09 | Quality monitoring

Origin: Quality team. Expected benefit: Expand review coverage.

Estimated complexity: Medium; 4-6 weeks.

Assumed value: Could review more cases than the current manual sample; no validated accuracy estimate. Build EUR 35,000; running EUR 2,500/month. Not authorized for individual employee scoring.

Current status: Proposed controlled trial.
